

Forest Town Nature Conservation Group

Butterflies and Dragonflies

Talk by Nigel Slater

Wednesday 13th March 2013

Forest Town Welfare, Sherwood Room

from 7 pm

Admission £2

New members and non-members welcome

Nigel Slater, a “keen amateur”, has travelled all over the country at different times of the year to see all of the many different types of British Butterflies and Dragonflies.

Benefit from Nigel’s extensive knowledge, experience and energy.

Learn how to identify the more common species, and something of the biology of their strikingly different life cycles.

When asked about the talk, Nigel explained: “I will encourage people to identify the species with some top tips, and I will also talk a bit about the future hopes for their populations.

“When I have finished, people should look at butterflies and dragonflies with a new enthusiasm!”
